DatE-IT

Data- | Elektro- | Informationstechnik

# Welcome to DatE-IT 2023

It's finally here, this year's DatE-IT, the place where you can find employment, summer jobs, master's theses, and much more. On November 14th, the fair opens its doors, and we in the DatE-IT team warmly welcome you.

This year, like the last, the fair will take place in the SB-Multisal and Betonghallen, where you will have the opportunity to meet over 80 companies. Don't miss the chance to talk to all these fantastic companies in the computer, electrical, software, and biomedical engineering industries. It doesn't matter if you're in your first or final year; take the opportunity to ask questions and get to know the companies. Who knows, you might meet your future employer.

For those of you who simply can't wait, we're starting the week before DatE-IT with Speakers' Week. During Speakers' Week, two exciting companies will offer lunchtime lectures to give you an insight into their activities. Be sure to keep an eye out for this.

Finally, I want to extend a big thank you to all the students and companies that make DatE-IT possible. Without you, the fair would never happen. An extra special thanks goes out to the DatE-IT team, who have worked hard for seven months to provide you with the best fair possible.

See you on November 14th!

# LINDEX

We are a growing fashion company from Sweden. The entire retail industry is changing and at Lindex, we are in the middle of three transformations in one, summarised as multi-channel, sustainability and digital. We truly believe in our ability to have an impact together and make a difference. We have about 440 stores in 18 markets, e-commerce and online shopping worldwide through third-party partnerships. At Lindex we bring digital to the core whether we develop a smooth experience for our customer in every touchpoint, digitalise our stores and supply chain or take on anything that comes next.

# Boeing

At the office in Gothenburg we work with software solutions used for scheduling crew and aircraft. We are world leaders with our optimization and planning software. We work in a dynamic and truly international business environment with a multitude of large airlines as our customers. We have around 35 different nationalities in the office and are proud of our diversity. Working at Boeing also offers the opportunity to solve some of the most challenging optimization problems in the world. This is done by applying advanced technology, mathematics and a good business understanding.

# FRA - Försvarets radioanstalt

FRA is a civil authority subordinated to the Ministry of Defence. FRA supplies intelligence to the Government of Sweden, to the Swedish Armed Forces and to other concerned authorities. FRA also provides cyber security services for selected government authorities and individual business operators who handle information deemed to be sensitive from a vulnerability point of view or in a security or defense policy aspect. FRA deals with detection and counter measures against cyber-attacks aimed at Swedish critical national IT-infrastructure.

## FÖRSVARSMAKTEN

Cyber defense is the Armed Forces' capability for armed combat in the cyber domain. Our task is to defend the Armed Forces through both proactive operations and reactive management of IT security incidents. The Swedish Armed Forces' cyber defense has unique tasks and mandates - where the core of the cyber defense is the ability to conduct cyber operations and to detect, identify and ward off threats to Swedish interests.

# Recorded Future

## Recorded Future®

Recorded Future is the most comprehensive and independent threat intelligence cloud platform. It enables organizations to identify and mitigate threats across cyber, supply-chain, physical, and fraud domains. It is trusted by 1700+ customers to get real-time, unbiased and actionable intelligence. With 140+ employees in our Gothenburg office, it's for us a strong R&D hub. Our various teams in Gothenburg match a variety of interests for the students at Chalmers/ DatE-IT whether they're interested in backend, front end, applications, integrations, design, analytics/AI, internal security etc.

We are a bit special, but you probably are too. Together we build great IT solutions, without stressing or compromising on quality. We strive to build close-knit, cross-functional teams that are jointly responsible for the entire project. It might be that you are part of more than one team at times, but everyone helps each other and there is no prestige in "being strong alone". We develop if you develop... you decide within what and in which direction. We encourage a diversity of personalities and experiences, and it's important that everyone feels included and allowed to be themselves.

# CHALMERS STUDENTKÅR REKRYTERING

Chalmers Studentkår Rekrytering is one of the student-run companies within the Chalmers Student Union. We help Chalmers students to kickstart their carrier! Do you not have a resume ready? We assist you in creating professional resumes to reach your dream job. Simultaneously we offer companies the opportunity to reach highly motivated Chalmers students with a smoking hot degree.

## Chalmers Teknologkonsulter AB

Chalmers Teknologkonsulter offers students from Chalmers the opportunity to apply their academic knowledge to real-world projects we conduct for all types of companies. We deliver completely customized solutions to our clients from our office next to the Johanneberg campus, where you work in teams with students from all programs at Chalmers. Our goal is for you as a student to grow professionally and expand your network to be able to land your dream job after graduation. We accomplish this by offering unparalleled flexibility and an incredibly broad set of competencies in our consultancy services, which sets us apart from our competitors.

## CHALMERS. STUDENTKÅR PROMOTION

Chalmers Studentkår Promotion is one out of 3 student driven companies consisting of students from both Chalmers and Gothenburg University. You've probably attended either a lunch lecture or a mingle event of ours, and maybe you'll be our next colleague in the future. Combine the best of both worlds- join us and gain experience in terms of sales and project management parallell with your studies!

# CHALMERS

## UNIVERSITY OF TECHNOLOGY

Chalmers University of Technology is a place where students can be part of an entrepreneurial journey. The entrepreneurial community that thrives here offers education, inspirational events, as well as career opportunities such as master's thesis work or employment in the many innovative companies located here at Chalmers. Chalmers is also the home of various researchers, actors and organisations focusing on innovation and entrepreneurship. They contribute to the entrepreneurial community through activities, knowledge and support, but most importantly they represent a wide network of entrepreneurial individuals.

Vesiro is developing an add-on software to existing databases based on our patented search algorithms. Our goal is to create a product that enables much better search performance for our customers, without them having to change their existing setup. Better search performance means that they can get by with fewer servers, which means that we can help them reduce both costs and energy consumption.

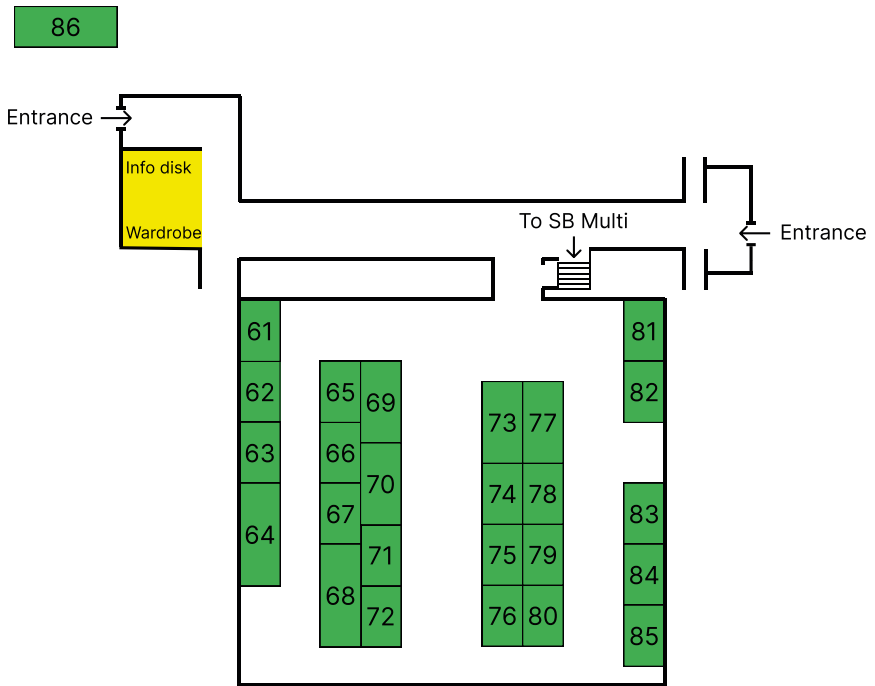

Oskar Hagman, Co-founder, [oskar@vesiro.com](mailto:oskar@vesiro.com), [www.vesiro.com](http://www.vesiro.com)

# ENERYIELD

Energyield provides a machine learning based software solution that predicts faults in power grids. For example, the module can predict severe grid faults hours or even days before they occur. The early warning generated gives grid operators the time needed to take necessary actions to avoid the outage. The solution is an important tool, to be used in operation and maintenance, to avoid blackouts, while maintaining efficient, stable and reliable grids. The module is a state-of-the-art machine learning based solution, which allows grid operators to switch from a reactive approach to a proactive one in their everyday operation.
